

ENVIRONMENTAL POLICY

CAF takes environmental protection as an objective of the organization

Environmental Policy

The Directors of CAF are aware that the work involved in their industrial activity provokes effects on the environment, included in the general policy of the company, the environment and its protection are taken into account as an objective of the organisation.

The company wishes:

- To adopt the necessary and economically viable methods to control, and in its case minimize, emissions to the atmosphere, the consumption of energy and waste generation, with the objective of preserving natural resources.
- To adopt the necessary arrangements to make its activity compatible with the protection of the environment, applying continually improving criteria, understanding the reduction of environmental impact as a priority in its policy.
- To guarantee compliance with the legal requirements applicable for substances of environmental protection, the same as the marked requirements for the specifications of the client.
- To define environmental objectives, annually, to determinate the development of the environmental management system
- To regularly control the compliance and the effectiveness of the adopted measures to assure that the objectives established by the organisation are carried out.
- To raise workers awareness, inform and make them aware about aspects related to the environment, in order to make their behaviour in line with the objectives and policy of the management system.
- To introduce gradually eco-design techniques, to optimise and control the environmental impact of the products throughout their life cycle

For that, materials and necessary resources will be provided in each case.

The environmental policy of CAF and different management plans of this area will be available for anyone who is interested and they are public.

Signed: Juan Gastesi Iriarte
Human Resources Manager
